

Application (My Wallet)

GOAL

The goal of our application is to create a savings management application that facilitates users and helps them managing their budget so that it is easier for them to set plans and determine the percentage and duration required to reach the material goal they want.

Methodology That we used

The most appropriate agile methodology for our project is Scrum Framework. Scrum is a framework for Agile software development that is widely used for developing complex software applications. It is an iterative and incremental approach to software development that emphasizes collaboration, flexibility, and adaptability. Scrum is particularly well-suited to ML applications because it allows for the continuous learning and evolution of the ML model.

Functional Requirement

01

The System shall link with the employee bank account.

02

The system shall allow the employee to determine the target of the wallet

03

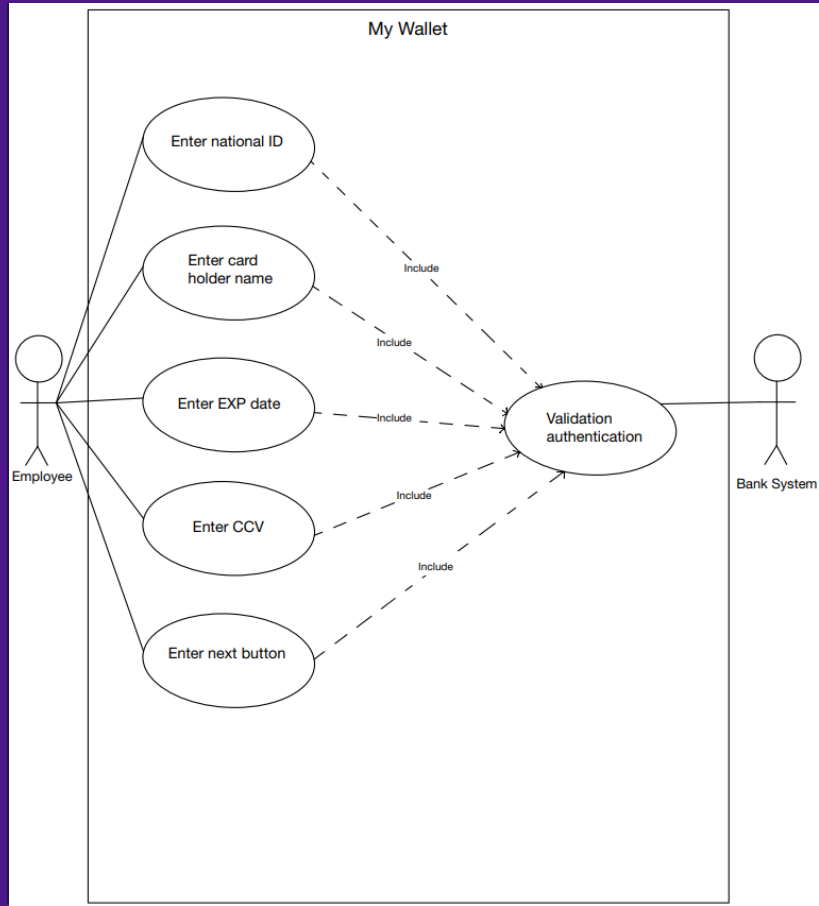

The system shall allow the employees to choose whether they want to be for a specific amount.

04

The system shall allow the employees to choose whether they want to be for a specific period of time.

Explanation of Functional Requirement

---My Wallet---

01 Bank Account

— □ ×

**Account Information**

Natiounal Id :

Card Holder :

Card Number :

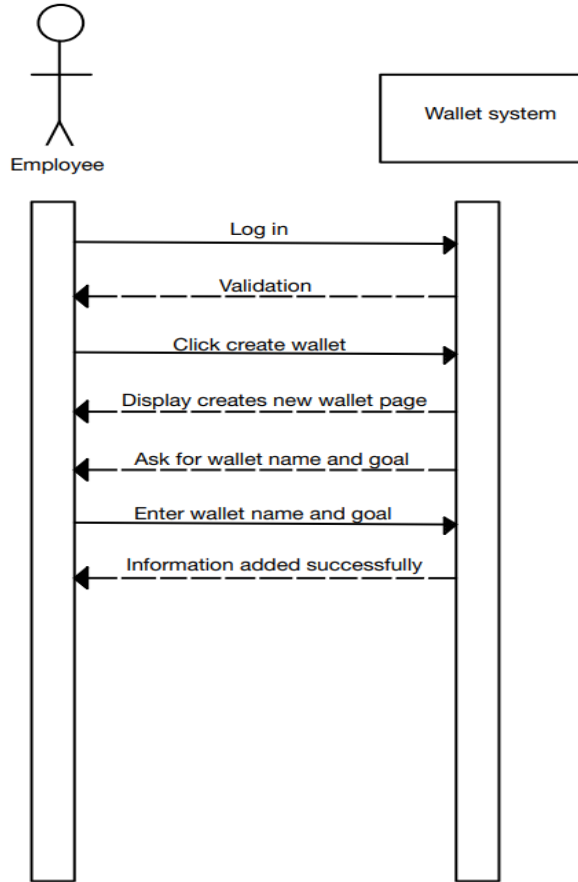

EXP Date

CVV

Next

01 Bank Account

02 determine the target

 — □ ×

 **Creat New Wallet**

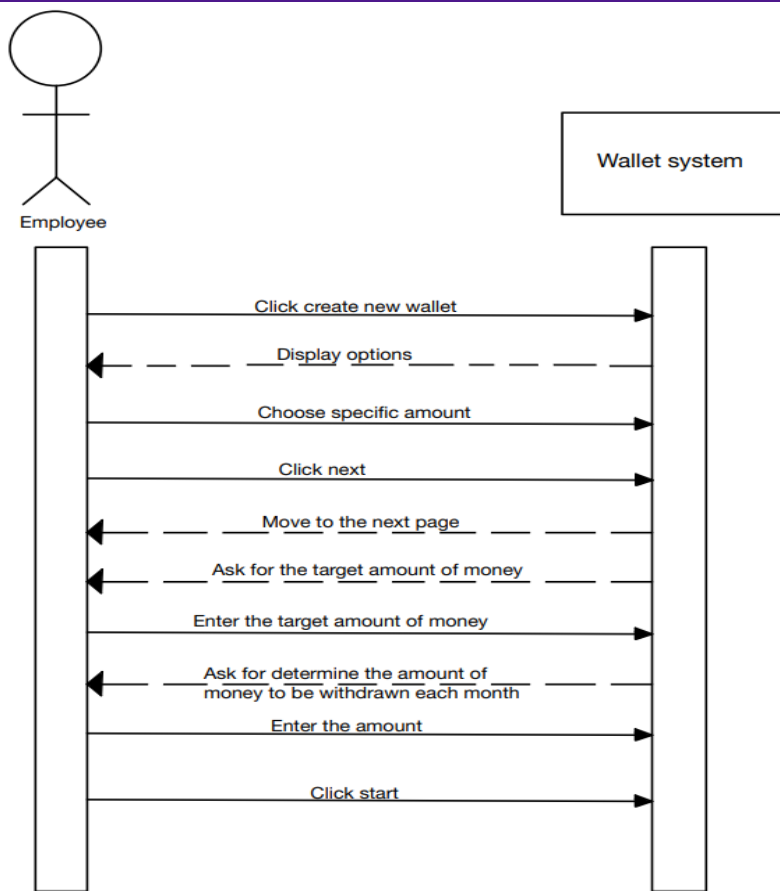

Wallet Name :

Walet Goal :

Usage Methodology
Specific period of time 

02 determine
the target

03 Specific Amount

— □ ×

 **Specific Amount**

Enter the target amount

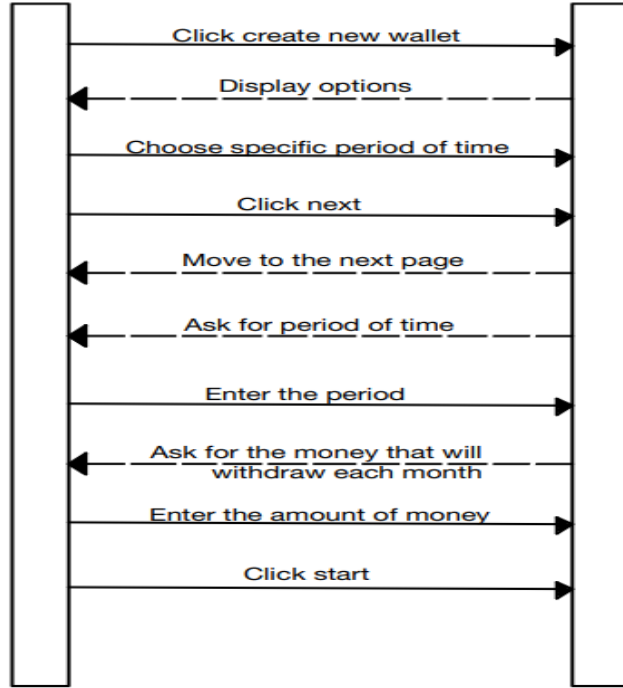

**Determine the amount of money
to be withdrawn each month**

03 Specific Amount

Wallet system

04 Specific period of time

 — □ ×

← **Specific Time**

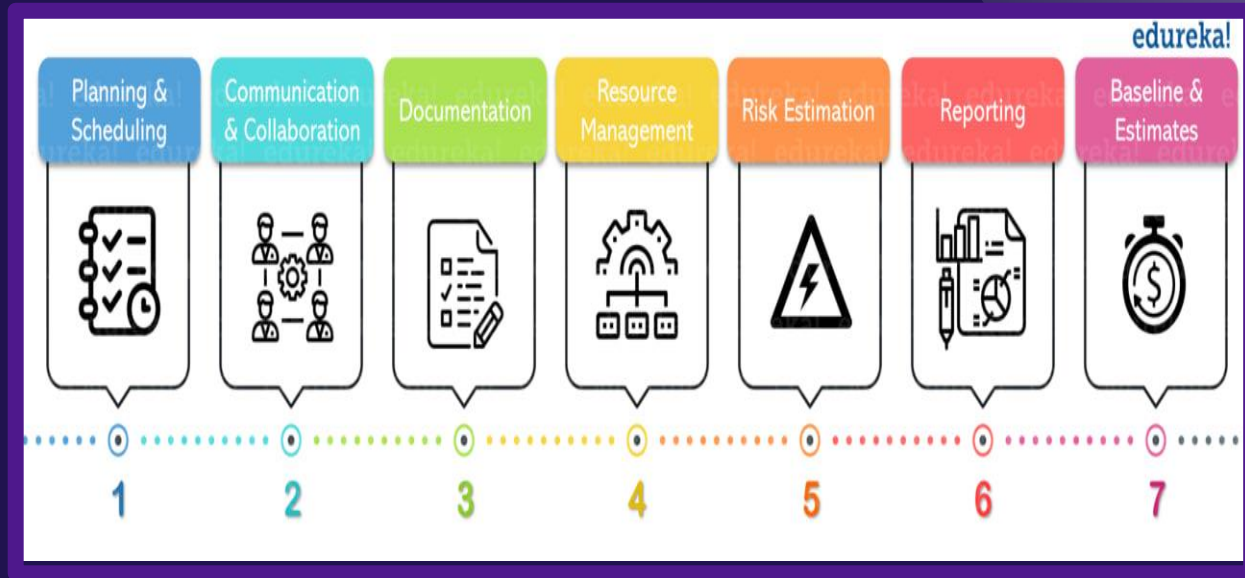

How many month?

**Detrmine the amount of mony
to be withdraw each month**

04 Specific period of time

Project Management Tools

What we have learned:

- How to divide the problem into small task.
- How we prioritize requirements.
- How to work as a team and how to divide tasks between us.
- How to differentiate between types of agile method.
- How we commit to delivery the project on time.

OUR TEAM :

PROPOSED BY

- Lana Alkhaldi
- Futoon Alnobi
- Jomanah Aljehani
- Somaya Rajb

PREPARED TO

- Dr. Rasha Alamri

Thanks !
